Discover Metalicon®

A growing range of ergonomic workspace accessories intelligently designed by our team of experts

The Metalicon® product range was launched back in 2012 in response to a growing need for robust but refined accessories to support the office furniture market. We now supply Metalicon® products to customers worldwide.

The office environment has changed dramatically over the last decade with an increased focus on wellbeing, in particular employers pay high attention to workplace ergonomics and the relationship to productivity.

We launched our first pole-mounted monitor arm in 2013 to help office workers avoid the risks associated with display screen equipment and save valuable desk space. Our Kardo range has proved very popular and now includes arms for single, twin and quad screen setups.

Metalicon® has since added more monitor arms, strong and flexible cable management and compact power modules to our growing product portfolio. We look forward to announcing further intelligently designed product developments very soon.

Powerlink
Under-desk power

These simple but robust power modules can be installed in cable trays or fixed to the underside of the desktop using the brackets or hook and loop pads provided.

With high quality aluminium alloy casing, solid construction and sleek appearance, Powerlink offers incredible value for money.

Powerlink modules can be linked to other under-desk or desktop power modules, including Boost and Solo Plus, using connector cables with a maximum of six power sockets in one series. Powerlink comes with a champagne alloy case and black plastic insert.

Type G (UK) or E (French) sockets

Easy to connect with Boost desktop modules
Mains to GST 3-pole female power cables and GST 3-pole male to female connector cables are available in various lengths (1-10m)

5 YEAR GUARANTEE

Powerlink comes with optional metal brackets and hook & loop fixings for fixing to desktop

Linx
Magnetic cable management spine

Designed with strength, flexibility and ease of installation in mind, Linx offers the latest developments in superior cable management.

The unique 'twist not pull' linking system ensures the vertebrae will never pull apart under tension, but will detach very easily when twisted sideways. This ensures that Linx never comes apart while in use, but remains incredibly easy to extend and manipulate when needed.

The new Linx Limpet makes installation quick and easy, fixing the spine to cable trays or desk frame with a magnet. The spine can be easily relocated if required.
Limpet magnetic fixing
Mount Linx anywhere on cable tray or desk frame

Alternative multipurpose fixing clamp
Mount to cable tray, wire basket or desktop

Unique linking system
Click-together vertebrae make Linx incredibly easy to shorten or lengthen and insert power and data cables

Dual cable compartments
Segregated power and data cables (30mm x 25mm)

Large stable base
Weighted base with dual cable exits

SPINE	LENGTH
20 vertebrae + weighted base	800
33 vertebrae + weighted base	1300
33 vertebrae, no base (for tray to tray use)	1280

Cable Trays
and baskets

Untidy power and data cables are unsightly, make cleaning difficult and can pose a safety risk. Use of a cable tray or basket underneath the desk helps to keep cables neat and tidy and the workspace clear.

Our range of simple but strong steel cable trays and baskets is designed to suit various desk sizes and arrangements.

Ocean Friendly Packaging®
Looking after our planet for future generations

Waste plastic is creating a global pollution problem, especially in our oceans. Nobody knows exactly how much, but recent estimates from respected scientific journals indicate some 8 million tonnes of plastic enter our oceans every year!

Since 2018 we have been focused on eliminating plastic from our product packaging. The majority of our product packaging is already made using recycled paper-based materials which can also be recycled again and our aim is to have all Metalicon® branded packaging completely plastic free by 2025.

Look out for our Ocean Friendly logo on Metalicon® product packaging. This indicates the packaging for this product is already completely plastic free! Thank you for supporting us in tackling this important issue.
